

Status report of WP5 activities, June 2010.

T5.1: Co-ordination and data management

- The final version of the Consortium Agreement is signed and has been sent out to all partners.
- Preparations for the ECOSUPPORT Annual Meeting that will take place on October 15, 2010, in conjunction with the Workshop on Uncertainties of scenario simulations and the BONUS; SMHI and AMBER organized Climate Modelling School.
- Preparations for a WP4 workshop.
- Management Group Telephone meetings were organized in April and June 2010. Minutes were taken, WP status reports collected and presented on the ECOSUPPORT project webpage.
- The ECOSUOPPORT webpage has continuously been updated with dates, news, talks, posters, reports, meeting minutes and data for download.

T5.2: Decision Support System (DSS)

- Work on the web structure of the DSS has started and a preliminary version is available at the ECOSUPPORT webpage.

T5.3: Dissemination and outreach activities

- Preparations for workshop on Uncertainties of scenario simulations to take place at SMHI, October 14, 2010. The workshop is intended for scientists concerned with scenario modelling of climate, nutrient load and atmospheric deposition and fisheries as well as risk management etc. Invited lecturers are Dr Samu Mäntyniemi and Dr Jouni Räisänen, both from University of Helsinki. Presentations and discussions will focus on methods to estimate uncertainties of scenario simulations, possibilities to combine Bayesian risk analysis and climate change ensemble modelling and possible collaborations between projects.
- Results from ECOSUPPORT project have been presented at the BALTEX conference with a solicited talk by Markus Meier, individual presentations from different partners and a joint project poster (soon available on web). The ECOSUPPORT joint poster was also presented at EUTRO 2010 as well as in a presentation with results from WP1 and WP2.
