

Report WP1

T1.1 Forcing data 1850-2007 (1-12)

Climate forcing data 1860-2007: Data from the available regional simulations with the model RCA have been distributed from SHMI to the project partners. Some institutions have started with the analysis of the data.

FMI has started the literature review of scattered data after 1850 [D1.1, M12]. Until now 25 articles or reports have been collected. Most of the data series focus on the Scandinavia or Western Europe. The oldest data cover 1850.

T1.2 Forcing data 1850-2007 (1-12)

Climate forcing data for some simulations already available with RCA have been distributed by SMHI

T1.3 Nutrient load forcing data 1960-2100 (1-12)

Subbasin delineation near to finished

Hydrometeorological data complete

Discharge data collection complete

Water quality data collection underway and near to finished
