

INVITATION TO

JOINT ECOSUPPORT & RECOCA FINAL CONFERENCE, Stockholm, 5-6 December, 2011.

REGISTRATION: by email to helen.andersson@smhi.se

LOCATION: Frescati, Geovetenskapens Hus, Stockholm University, Sweden

TIME: 5 December, 2011 12.00 – 6 December 2011 16.00

CONTENT: RECOCA and ECOSUPPORT projects are concerned with the environmental health of the Baltic Sea, today and into the future. The projects have, with slightly different scientific focus, dealt with ecosystem-based environmental management of the Baltic Sea to combat eutrophication, ranging from abatements in the catchment area of the Baltic Sea to the resulting marine status of such abatements, now and in projected IPCC climate-change scenarios. Due to the mutual scientific interests, a joint final conference has been planned in order to share and discuss the main scientific findings of ECOSUPPORT and RECOCA.

Time will also be allocated to project specific discussions and preparations of final commitments, reporting etc.

The people responsible for presentations from the work packages in the agenda will be contacted in order to set the details. In general it is good to leave plenty of space for discussion after each presentation.
