

International Max Planck Research School on Earth System Modelling

The International Max Planck Research School on Earth System Modelling (IMPRS-ESM), located in Hamburg, Germany, is offering

1 Doctoral Position

to an outstanding student interested in interdisciplinary climate research. Our doctoral students contribute to the understanding of the Earth system through the application, evaluation and development of a spectrum of Earth system models at different levels of complexity and spatial and temporal scales. Emphasizing the physical system, the School also comprises institutions and scientists from the broader field of Earth sciences, including economics and social sciences. The IMPRS-ESM strives to attract a diversity of talented men and women from all nationalities to research in the Earth system sciences. To learn more of our doctoral program visit www.earthsystemschool.mpg.de and see <http://www.earthsystemschool.mpg.de/Application-Admission.5.0.html> to learn about possible research themes.

The PhD program is open to applicants holding a German Diplom degree or the equivalent (e.g., Masters degree with written thesis) in physics, geophysical sciences (incl. meteorology and oceanography), chemistry, ecology, mathematics, computer science, engineering, or economics.

To apply, please complete the IMPRS-ESM online registration and subsequently submit the requested documents via e-mail. Online registration closes March 15, 2011. The selection procedure includes an interview. Doctoral students receive financial support of about 1,300 Euros/month for a period of 3 years. There are no tuition fees for PhD students (however, there University applies some administrative charges).
